Doug, Thanks again for the charts, my major comment is that you should remove the "new local landfill" box from # 3 in the PR sediments decision process slide. On the other slide, under 10.9, 3rd box replace "address immediate health concerns" with "reduce exposure", 4th box change timeframe to "12 - 18 months". Lower 8 Mile box # 5 change date to "late 2012?" Finally, 17 Mile, last box expected ---- "late 2015?"

Hi all, attached are some ideas to portray the range of decisions that need to be made, let me know if you think this might help and what we can do to make them more effective

thanks

Doug
